Subject index of volume 344

A

ACE inhibitors, cardiac renin-angiotensin system, captopril, ramiprilat, noradrenaline; heart, rats 297
acetylcholine release, cisplatin, enterochromaffine cells, 5-hydroxytryptamine; intestine, guinea-pig 143
acetylcholine release, 5-hydroxytryptamine receptors, neurokinin 3-receptors; ileum, guinea-pig 8
acetylcholine release, muscarinic receptor subtypes, dopamine release; substantia nigra dendrosomes, rats 275
acetylcholine release, nerve stimulation, transmural stimulation; trachea, rats, guinea-pig 403
action potential, inotropism, calcium, phenylephrine; heart muscle, rats 574
action potential, muscle contraction, ion channel blockers; mouse diaphragm, 691
action potential, pacemaker current, potassium outward current, YS 035, verapamil derivatives; cardiac Purkinje fibres, sheep, 653
adenosine, adenosine receptor subtypes, neurotransmission; heart, guinea-pig 464
adenosine, inotropic effect, cAMP, beta-adrenoceptors; heart, dog 70
adenosine, protein kinase C, pertussis toxin, prostaglandin E; human Jurkat cells 611
adenosine deaminase, coronary occlusion, adenosine release; heart, rats 544
adenosine receptor subtypes, N-ethylmaleimide; bovine cardiac and cerebral membranes, 639
adenosine receptor subtypes, neurotransmission, adenosine; heart, guinea-pig 464
adenosine receptors, noradrenaline release, alpha 2 adrenoceptors; hippocampus, rabbit 187
adenosine release, adenosine deaminase, coronary occlusion; heart, rats 544
adenosine release, inosine release, excitatory amino acids; hippocampal slices, rats 538
adrenaline release, nitric oxide, noradrenaline release; haemodynamics, rabbit, 720
adrenergic transmission, purinergic transmission, ATP, nicotine receptors, cotransmission; ileocolic artery, rabbit 174
adrenoceptors, imidazolines, structure-activity; aorta, rats, human platelets 454
adrenoceptors, noradrenaline-ATP cotransmission; vas deferens, rats, arteries, rabbit 532
alpha 2 adrenoceptors, adenosine receptors, noradrenaline release; hippocampus, rabbit 187
alpha 2 adrenoceptors, noradrenaline release, histamine; hypothalamus, conscious rats 183
alpha 2-adrenoceptors, Ca-currents; chick sympathetic neurons 382
alpha 2-adrenoceptors, noradrenaline release, imidazoline receptor, guanidine derivatives; pulmonary artery, rabbit, 630
alpha 2-adrenoceptors, noradrenaline release; chick sympathetic neurons 130
alpha-adrenergic receptor subtypes; human veins 302
alpha-adrenoceptors, excitation-contraction coupling; portal vein, rats 206
amiloride analogues, endothelium-dependent vasorelaxant, Na−Ca-exchange; cardiovascular tissues, rats 220

anabolic effect, clenbuterol, beta 2-adrenoceptors, growth; heart, skeletal muscle, rats 449
angiotensin 2, calcium entry blockers; aorta, rats, guinea-pig 107
angiotensin-converting enzyme, B2-kinin receptor antagonists, cGMP; human endothelial cells 126
antiarrhythmic drugs, bisaramil; cardiac cells, guinea-pig, rabbit, dog 323
antiarrhythmic drugs, chronotropic effect; sino-atrial node, rabbit, 674
antiarrhythmic drugs, stereoselectivity, disopyramide; papillary muscle, guinea-pig, 662
antiarrhythmics, local anaesthetics, sodium channels; human muscle 596
antidepressant drugs, NMDA receptors, long-therm potentiation; hippocampu, rats 344, 79
antidepressants, beta-adrenoceptors, steroid hormones; pregnancy, ovariectomy, rats 437
antidepressants, serotonin, tianeptine; medial septal neurons, rats 568
anti-ischemic compounds, veratridine, calcium uptake, sodium channel; left atria, rats 101
antipsychotic agents, dopamine receptor agonists, SDZ 208-911, SDZ 208-912, terguride; behaviour, rats 263
aprindine, sodium channels, receptor hypothesis, deprotonation; ventricular myocytes, guinea-pig 331
arecoline, receptor classification, muscarinic receptor, G-proteins; atria, rats 201
arginine-vasopressin, atrial natriuretic peptide, blood volume expansion; kidney, Brattleboro rats 119
ATP, nicotine receptors, cotransmission, adrenergic transmission, purinergic transmission; ileocolic artery, rabbit 174
ATP release, noradrenaline release, nicotine receptors, cotransmission; vas deferens, guinea-pig 419
atrial natriuretic peptide, blood volume expansion, arginine-vasopressin; kidney, Brattleboro rats 119

B

B2-kinin receptor antagonists, cGMP, angiotensin-converting enzyme; human endothelial cells 126
benzamides, 5-HT receptors, cisapride, renzapride; human right atrium 150
benzodiazepine antagonists, nociception, kappa-opioid receptors, opioid antagonists, diazepam; tail-flick, rats 84
benzodiazepines, conflict behaviour, GABAergic neurotransmission; Vogel procedure, rats 314
beta 2-adrenoceptors, growth, anabolic effect, clenbuterol; heart, skeletal muscle, rats 449
beta-adrenoceptor antagonists, norepinephrine spillover rate; hypertensive rats 47
beta-adrenoceptor density, phenylethanolamines, structure-activity, clenbuterol; bovine skeletal muscle 442
beta-adrenoceptors, adenosine, inotropic effect, cAMP; heart, dog 70
beta-adrenoceptors, cAMP, CGP 20,712 A, inotropic effect; heart, cat 56
beta-adrenoceptors, denervation-supersensitivity; human transplanted heart 430
beta-adrenoceptors, steroid hormones, antidepressants; pregnancy, ovariectomy, rats 437
bisaramil, antiarrhythmic drugs; cardiac cells, guinea-pig, rabbit, dog 323
blood volume expansion, arginine-vasopressin, atrial natriuretic peptide; kidney, Brattleboro rats 119
botulinum-A toxin, cyclic nucleotides, exocytosis, tetanus toxin; chromaffine cells, bovine cell cultures 387
bradykinin, polymodal receptor, prostaglandins; canine testis-spermatic nerve 368
brain drug concentrations, yohimbine, serum drug concentrations; injections, rats 308

C

Ca-currents, alpha 2-adrenoceptors; chick sympathetic neurons 382
calcium, neuropeptide Y receptors, G-protein, cAMP; human neuroblastoma cells 1
calcium, phenylephrine, action potential, inotropism; heart muscle, rats 574
calcium channel modulators, 1,4-dihydropyridines; ileum, rats, 698
calcium channels, noradrenaline release, neuropeptide Y, nicotine, protein kinase C; heart, guinea pig 527
calcium current, potassium current, imipramine; cardiac myocytes, guinea-pig, 645
calcium entry blockers, angiotensin 2; aorta, rats, guinea-pig 107
calcium entry blockers, nitrendipine, dihydropyridines; porcine heart 488
calcium uptake, sodium channel, anti-ischemic compounds, veratridine; left atria, rats 101
cAMP, beta-adrenoceptors, adenosine, inotropic effect; heart, dog 70
cAMP, calcium, neuropeptide Y receptors, G-protein; human neuroblastoma cells 1
cAMP, CGP 20,712 A, inotropic effect, beta-adrenoceptors; heart, cat 56
cAMP, E-1020, phosphodiesterase inhibitor; vascular smooth muscle, rats 602
cAMP, phosphodiesterase, inotropic effect; human cardiac muscle 90
cancer chemotherapy, vomiting, 5-HT, tropireton; house musk shrew 564
capsaicin, ion transport; descending colon, rats 557
capsaicin analogs, resiniferatoxin, vanilloid receptors; dorsal root ganglion, rats 551
captopril, ramiprilat, noradrenaline, ACE inhibitors, cardiac renin-angiotensin system; heart, rats 297
cardiac glycosides, palytoxin; ventricular myocytes, rats 247
cardiac renin-angiotensin system, captopril, ramiprilat, noradrenaline, ACE inhibitors; heart, rats 297
cardiotonic agents, DPI 201-106, inotropism, infarction; hemodynamics, dog 478
carrier-mediated outward transport, dopamine; vas deferens, rats, 619
cGMP, angiotensin-converting enzyme, B2-kinin receptor antagonists; human endothelial cells 126
cGMP, chemoattractant receptors, NO-containing compounds, exocytosis; human neutrophils 396
cGMP, endothelium-derived nitric oxide, nitrovasodilators; aorta, hamster 345
CGP 20,712 A, inotropic effect, beta-adrenoceptors, cAMP; heart, cat 56
chemoattractant receptors, NO-containing compounds, exocytosis, cGMP; human neutrophils 396
chloride transport, opioid peptides, opioid antagonists, intestinal secretion; colonic mucosa, guinea-pig 360
cholera toxin, G-proteins, 5-HT autoreceptors, pertussis toxin; hippocampus, rats 160
chronotropic effect, antiarrhythmic drugs; sino-atrial node, rabbit, 674
cigarette smoke, indomethacin, pharmacokinetics; administration routes, rats 500
cisapride, renzapride, benzamides, 5-HT receptors; human right atrium 150
cisplatin, enterochromaffine cells, 5-hydroxytryptamine, acetylcholine release; intestine, guinea-pig 143
clenbuterol, beta 2-adrenoceptors, growth, anabolic effect; heart, skeletal muscle, rats 449
clenbuterol, beta-adrenoceptor density, phenylethanolamines, structure-activity; bovine skeletal muscle 442
coenzyme Q 10, cyanide, K-channel; cardiac myocytes, guinea-pig 133
competitive antagonism, 5-HT receptor antagonists; choroid plexus, pig 137
COMT inhibitors, dopamine, MAO inhibitors; brain, rats 412
conflict behaviour, GABAergic neurotransmission, benzodiazepines; Vogel procedure, rats 314
coronary occlusion, adenosine release, adenosine deaminase; heart, rats 544
cotransmission, adrenergic transmission, purinergic transmission, ATP, nicotine receptors; ileocolic artery, rabbit 174
cotransmission, ATP release, noradrenaline release, nicotine receptors; vas deferens, guinea-pig 419
coupling mechanisms, neurokinin receptor subtypes, spasmogens; taenia caeci, guinea-pig 225
CP-96,345, tachykinin receptors, hypotension; circulation, dog 471
cromakalim, minoxidil, K-channel openers, vasorelaxation; aorta, rats 351
cyanide, K-channel, coenzyme Q 10; cardiac myocytes, guinea-pig 133

cyclic nucleotides, exocytosis, tetanus toxin, botulinum-A toxin; chromaffine cells, bovine cell cultures 387
cysteinyl-leukotrienes, platelet-activating factor, vasoconstriction; porcine pulmonary blood vessels 495

D

denervation-supersensitivity, beta-adrenoceptors; human transplanted heart 430
deprotonation, aprindine, sodium channels, receptor hypothesis; ventricular myocytes, guinea-pig 331
diazepam, benzodiazepine antagonists, nociception, kappa-opioid receptors, opioid antagonists; tail-flick, rats 84
dihydronaphthyridines, dihydropyridines, vascular selectivity, inotropism; porcine cardiac and vascular smooth muscle 337
dihydropyridines, calcium entry blockers, nitrendipine; porcine heart 488
dihydropyridines, vascular selectivity, inotropism, dihydronaphthyridines; porcine cardiac and vascular smooth muscle 337
1,4-dihydropyridines, calcium channel modulators; ileum, rats, 698
disopyramide, antiarrhythmic drugs, stereoselectivity; papillary muscle, guinea-pig, 662
dopamine, carrier-mediated outward transport; vas deferens, rats, 619
dopamine, MAO inhibitors, COMT inhibitors; brain, rats 412
dopamine autoreceptor agonist, U-86170f; rats 509
dopamine autoreceptors, dopamine release; neostriatum, nucleus accumbens, rats, 623
dopamine DA 2 receptors; renal cortex, rats 259
dopamine receptor agonists, monoamines, Parkinson's disease; chronic treatment, rats 281
dopamine receptor agonists, SDZ 208-911, SDZ 208-912, terguride, antipsychotic agents; behaviour, rats 263
dopamine release, acetylcholine release, muscarinic receptor subtypes; substantia nigra dendrosomes, rats 275
dopamine release, dopamine autoreceptors; neostriatum, nucleus accumbens, rats, 623
dopamine uptake, GBR 12909, monoaminergic neurotransmission; striatum, substantia nigra, rats 16
DPI 201-106, inotropism, infarction, cardiotonic agents; hemodynamics, dog 478

E

E-1020, phosphodiesterase inhibitor, cAMP; vascular smooth muscle, rats 602
endothelin-converting enzyme, phosphoramidon; vas deferens, rats 505
endothelium-dependent vasodilators, nitric oxide, glyceryltrinitrate; Langendorff-heart, rabbit 240
endothelium-dependent vasorelaxant, Na−Ca-exchange, amiloride analogues; cardiovascular tissues, rats 220
endothelium-derived nitric oxide, nitrovasodilators, cGMP; aorta, hamster 345
energy requirements, glucose deprivation, hypoxia, noradrenaline; vas deferens, atrium, rats 286
energy requirements, potassium, noradrenaline; vas deferens, atrium, rats 520
enterochromaffine cells, 5-hydroxytryptamine, acetylcholine release, cisplatin; intestine, guinea-pig 143
epithelial derived relaxant factor, muscarinic receptor subtypes; trachea, guinea-pig 29
ethanol, NMDA receptors, noradrenaline release; brain cortex slices, rats 167
ethanol, pertussis toxin, G-proteins; behavioural effects, mice 252
ethylcholine aziridium, glutamatergic system, NMDA receptors, neurotoxicity; hippocampus, rats 213
excitation-contraction coupling, alpha-adrenoceptors; portal vein, rats 206
excitatory amino acids, adenosine release, inosine release; hippocampal slices, rats 538
exocytosis, cGMP, chemoattractant receptors, NO-containing compounds; human neutrophils 396
exocytosis, tetanus toxin, botulinum-A toxin, cyclic nucleotides; chromaffine cells, bovine cell cultures 387

F

free radicals, superoxide dismutase, 6-hydroxydopamine; sympathetic denervation, dog 36

G

GABAergic neurotransmission, benzodiazepines, conflict behaviour; Vogel procedure, rats 314
GBR 12909, monoaminergic neurotransmission, dopamine uptake; striatum, substantia nigra, rats 16
glucose deprivation, hypoxia, noradrenaline, energy requirements; vas deferens, atrium, rats 286
glutamatergic system, NMDA receptors, neurotoxicity, ethylcholine aziridium; hippocampus, rats 213
glyceryltrinitrate, endothelium-dependent vasodilators, nitric oxide; Langendorff-heart, rabbit 240
G-protein, cAMP, calcium, neuropeptide Y receptors; human neuroblastoma cells 1
G-protein, histamine receptors; ventricular myocytes, guinea-pig 582
G-proteins, arecoline, receptor classification, muscarinic receptor; atria, rats 201
G-proteins, ethanol, pertussis toxin; behavioural effects, mice 252
G-proteins, 5-HT autoreceptors, pertussis toxin, cholera toxin; hippocampus, rats 160
growth, anabolic effect, clenbuterol, beta 2-adrenoceptors; heart, skeletal muscle, rats 449
guanidine derivatives, alpha 2-adrenoceptors, noradrenaline release, imidazoline receptor; pulmonary artery, rabbit, 630

H

histamine, alpha 2 adrenoceptors, noradrenaline release; hypothalamus, conscious rats 183
histamine receptors, G-protein; ventricular myocytes, guinea-pig 582
5-HT, tropireton, cancer chemotherapy, vomiting; house musk shrew 564
5-HT autoreceptors, pertussis toxin, cholera toxin, G-proteins; hippocampus, rats 160
5-HT receptor antagonists, competitive antagonism; choroid plexus, pig 137
5-HT receptors, cisapride, renzapride, benzamides; human right atrium 150
6-hydroxydopamine, free radicals, superoxide dismutase; sympathetic denervation, dog 36
5-hydroxytryptamine, acetylcholine release, cisplatin, enterochromaffine cells; intestine, guinea-pig 143
5-hydroxytryptamine receptors, neurokinin 3-receptors, acetylcholine release; ileum, guinea-pig 8
hypotension, CP-96,345, tachykinin receptors; circulation, dog 471
hypoxia, noradrenaline, energy requirements, glucose deprivation; vas deferens, atrium, rats 286

I

imidazoline receptor, guanidine derivatives, alpha 2-adrenoceptors, noradrenaline release; pulmonary artery, rabbit, 630
imidazolines, structure-activity, adrenoceptors; aorta, rats, human platelets 454
imipramine, calcium current, potassium current; cardiac myocytes, guinea-pig, 645
indomethacin, pharmacokinetics, cigarette smoke; administration routes, rats 500
infarction, cardiotonic agents, DPI 201-106, inotropism; hemodynamics, dog 478
inosine release, excitatory amino acids, adenosine release; hippocampal slices, rats 538
inotropic effect, beta-adrenoceptors, cAMP, CGP 20,712 A; heart, cat 56
inotropic effect, cAMP, beta-adrenoceptors, adenosine; heart, dog 70
inotropic effect, cAMP, phosphodiesterase; human cardiac muscle 90
inotropism, calcium, phenylephrine, action potential; heart muscle, rats 574

inotropism, dihydronaphthyridines, dihydropyridines, vascular selectivity; porcine cardiac and vascular smooth muscle 337
inotropism, infarction, cardiotonic agents, DPI 201-106; hemodynamics, dog 478
intestinal secretion, chloride transport, opioid peptides, opioid antagonists; colonic mucosa, guinea-pig 360
ion channel blockers, action potential, muscle contraction; mouse diaphragm, 691
ion transport, capsaicin; descending colon, rats 557

K

kappa-opioid receptors, opioid antagonists, diazepam, benzodiazepine antagonists, nociception; tail-flick, rats 84
K-channel, coenzyme Q 10, cyanide; cardiac myocytes, guinea-pig 133
K-channel openers, vasorelaxation, cromakalim, minoxidil; aorta, rats 351
kinin, venom phospholipase A2, Naja naja atra venom, mast cells; hind-paw, rats 377

L

levodopa, 3-O-methyldopa, pharmacokinetics; microdialysis, muscle, dog 514
local anaesthetics, sodium channels, antiarrhythmics; human muscle 596
lyotropic anions, thiocyanate, neurotransmitter; vascular smooth muscle, rats 193

M

MAO inhibitors, COMT inhibitors, dopamine; brain, rats 412
mast cells, kinin, venom phospholipase A2, Naja naja atra venom; hind-paw, rats 377
minoxidil, K-channel openers, vasorelaxation, cromakalim; aorta, rats 351
monoaminergic neurotransmission, dopamine uptake, GBR 12909; striatum, substantia nigra, rats 16
monoamines, Parkinson's disease, dopamine receptor agonists; chronic treatment, rats 281
muscarinic receptor, G-proteins, arecoline, receptor classification; atria, rats 201
muscarinic receptor antagonists, spasmolytic drugs; common bile duct, guinea-pig 114
muscarinic receptor subtypes, dopamine release, acetylcholine release; substantia nigra dendrosomes, rats 275
muscarinic receptor subtypes, epithelial derived relaxant factor; trachea, guinea-pig 29
muscle contraction, ion channel blockers, action potential; mouse diaphragm, 691

N

Na—Ca-exchange, amiloride analogues, endothelium-dependent vasorelaxant; cardiovascular tissues, rats 220
Naja naja atra venom, mast cells, kinin, venom phospholipase A2; hind-paw, rats 377
NANC relaxation, serotonin, nitric oxide; ileum, ileocolonic junction, dog, 716
nerve stimulation, transmural stimulation, acetylcholine release; trachea, rats, guinea-pig 403
N-ethylmaleimide, adenosine receptor subtypes; bovine cardiac and cerebral membranes, 639
neurokinin 3-receptors, acetylcholine release, 5-hydroxytryptamine receptors; ileum, guinea-pig 8
neurokinin receptor subtypes, spasmogens, coupling mechanisms; taenia caeci, guinea-pig 225
neuropeptide Y, nicotine, protein kinase C, calcium channels, noradrenaline release; heart, guinea pig 527
neuropeptide Y receptors, G-protein, cAMP, calcium; human neuroblastoma cells 1
neurotoxicity, ethylcholine aziridium, glutamatergic system, NMDA receptors; hippocampus, rats 213
neurotransmission, adenosine, adenosine receptor subtypes; heart, guinea-pig 464
neurotransmitter, lyotropic anions, thiocyanate; vascular smooth muscle, rats 193
nicorandil, vasodilating action, 2-nicotinamidoethyl acetate, potassium channel opener; aorta, rabbit 235
nicorandil, vasodilator potencies; coronary arteries, dog 589
2-nicotinamidoethyl acetate, potassium channel opener, nicorandil, vasodilating action; aorta, rabbit 235
nicotine, protein kinase C, calcium channels, noradrenaline release, neuropeptide Y; heart, guinea pig 527
nicotine receptors, cotransmission, adrenergic transmission, purinergic transmission, ATP; ileocolic artery, rabbit 174
nicotine receptors, cotransmission, ATP release, noradrenaline release; vas deferens, guinea-pig 419
nitrendipine, dihydropyridines, calcium entry blockers; porcine heart 488
nitric oxide, glyceryltrinitrate, endothelium-dependent vasodilators; Langendorff-heart, rabbit 240
nitric oxide, NANC relaxation, serotonin; ileum, ileocolonic junction, dog, 716
nitric oxide, noradrenaline release, adrenaline release; haemodynamics, rabbit, 720
nitrovasodilators, cGMP, endothelium-derived nitric oxide; aorta, hamster 345
NMDA receptors, neurotoxicity, ethylcholine aziridium, glutamatergic system; hippocampus, rats 213
NMDA receptors, noradrenaline release, ethanol; brain cortex slices, rats 167
nociception, kappa-opioid receptors, opioid antagonists, diazepam, benzodiazepine antagonists; tail-flick, rats 84
NO-containing compounds, exocytosis, cGMP, chemoattractant receptors; human neutrophils 396
noradrenaline, ACE inhibitors, cardiac renin-angiotensin system, captopril, ramiprilat; heart, rats 297
noradrenaline, energy requirements, glucose deprivation, hypoxia; vas deferens, atrium, rats 286
noradrenaline, energy requirements, potassium; vas deferens, atrium, rats 520
noradrenaline, stady-state concentration gradient, uptake 1; vas deferens, rats 41
noradrenaline release, adrenaline release, nitric oxide; haemodynamics, rabbit, 720
noradrenaline release, alpha 2 adrenoceptors, adenosine receptors; hippocampus, rabbit 187
noradrenaline release, alpha 2-adrenoceptors; chick sympathetic neurons 130
noradrenaline release, ethanol, NMDA receptors; brain cortex slices, rats 167
noradrenaline release, histamine, alpha 2 adrenoceptors; hypothalamus, conscious rats 183
noradrenaline release, imidazoline receptor, guanidine derivatives, alpha 2-adrenoceptors; pulmonary artery, rabbit, 630
noradrenaline release, neuropeptide Y, nicotine, protein kinase C, calcium channels; heart, guinea pig 527
noradrenaline release, nicotine receptors, cotransmission, ATP release; vas deferens, guinea-pig 419
noradrenaline-ATP cotransmission, adrenoceptors; vas deferens, rats, arteries, rabbit 532
norepinephrine spillover rate, beta-adrenoceptor antagonists; hypertensive rats 47

O

3-O-methyldopa, pharmacokinetics, levodopa; microdialysis, muscle, dog 514
opioid antagonists, diazepam, benzodiazepine antagonists, nociception, kappa-opioid receptors; tail-flick, rats 84
opioid antagonists, intestinal secretion, chloride transport, opioid peptides; colonic mucosa, guinea-pig 360
opioid peptides, opioid antagonists, intestinal secretion, chloride transport; colonic mucosa, guinea-pig 360

P

pacemaker current, potassium outward current, YS 035, verapamil derivatives, action potential; cardiac Purkinje fibres, sheep, 653
palytoxin, cardiac glycosides; ventricular myocytes, rats 247
Parkinson's disease, dopamine receptor agonists, monoamines; chronic treatment, rats 281
pertussis toxin, cholera toxin, G-proteins, 5-HT autoreceptors; hippocampus, rats 160

pertussis toxin, G-proteins, ethanol; behavioural effects, mice 252
pertussis toxin, prostaglandin E, adenosine, protein kinase C; human Jurkat cells 611
pharmacokinetics, cigarette smoke, indomethacin; administration routes, rats 500
pharmacokinetics, levodopa, 3-O-methyldopa; microdialysis, muscle, dog 514
phenylephrine, action potential, inotropism, calcium; heart muscle, rats 574
phenylethonolamines, structure-activity, clenbuterol, beta-adrenoceptor density; bovine skeletal muscle 442
phosphodiesterase, inotropic effect, cAMP; human cardiac muscle 90
phosphodiesterase inhibitor, cAMP, E-1020; vascular smooth muscle, rats 602
phosphodiesterase inhibitors, superoxide release, thimerosal; human polymorphonuclear leukocytes, 682
phosphoramidon, endothelin-converting enzyme; vas deferens, rats 505
platelet-activating factor, vasoconstriction, cysteinyl-leukotrienes; porcine pulmonary blood vessels 495
polymodal receptor, prostaglandins, bradykinin; canine testis-spermatic nerve 368
potassium, noradrenaline, energy requirements; vas deferens, atrium, rats 520
potassium channel opener, nicorandil, vasodilating action, 2-nicotinamidoethyl acetate; aorta, rabbit 235
potassium channel openers, vasorelaxants; vascular muscle, rats, 706
potassium current, imipramine, calcium current; cardiac myocytes, guinea-pig, 645
potassium outward current, YS 035, verapamil derivatives, action potential, pacemaker current; cardiac Purkinje fibres, sheep, 653
prostaglandin E, adenosine, protein kinase C, pertussis toxin; human Jurkat cells 611
prostaglandins, bradykinin, polymodal receptor; canine testis-spermatic nerve 368
protein kinase C, calcium channels, noradrenaline release, neuropeptide Y, nicotine; heart, guinea pig 527
protein kinase C, pertussis toxin, prostaglandin E, adenosine; human Jurkat cells 611
purinergic transmission, ATP, nicotine receptors, cotransmission, adrenergic transmission; ileocolic artery, rabbit 174

R

ramiprilat, noradrenaline, ACE inhibitors, cardiac renin-angiotensin system, captopril; heart, rats 297
receptor classification, muscarinic receptor, G-proteins, arecoline; atria, rats 201
receptor hypothesis, deprotonation, aprindine, sodium channels; ventricular myocytes, guinea-pig 331
renzapride, benzamides, 5-HT receptors, cisapride; human right atrium 150
resiniferatoxin, vanilloid receptors, capsaicin analogs; dorsal root ganglion, rats 551

S

SDZ 208-911, SDZ 208-912, terguride, antipsychotic agents, dopamine receptor agonists; behaviour, rats 263
SDZ 208-912, terguride, antipsychotic agents, dopamine receptor agonists, SDZ 208-911; behaviour, rats 263
serotonin, nitric oxide, NANC relaxation; ileum, ileocolonic junction, dog, 716
serotonin, tianeptine, antidepressants; medial septal neurons, rats 568
serum drug concentrations, brain drug concentrations, yohimbine; injections, rats 308
sodium channel, anti-ischemic compounds, veratridine, calcium uptake; left atria, rats 101
sodium channels, antiarrhythmics, local anaesthetics; human muscle 596
sodium channels, receptor hypothesis, deprotonation, aprindine; ventricular myocytes, guinea-pig 331
spasmogens, coupling mechanisms, neurokinin receptor subtypes; taenia caeci, guinea-pig 225
spasmolytic drugs, muscarinic receptor antagonists; common bile duct, guinea-pig 114
stady-state concentration gradient, uptake 1, noradrenaline; vas deferens, rats 41
stereoselectivity, disopyramide, antiarrhythmic drugs; papillary muscle, guinea-pig, 662
steroid hormones, antidepressants, beta-adrenoceptors; pregnancy, ovariectomy, rats 437
structure-activity, adrenoceptors, imidazolines; aorta, rats, human platelets 454
structure-activity, clenbuterol, beta-adrenoceptor density, phenylethanolamines; bovine skeletal muscle 442
superoxide dismutase, 6-hydroxydopamine, free radicals; sympathetic denervation, dog 36
superoxide release, thimerosal, phosphodiesterase inhibitors; human polymorphonuclear leukocytes, 682

T

tachykinin receptors, hypotension, CP-96,345; circulation, dog 471
terguride, antipsychotic agents, dopamine receptor agonists, SDZ 208-911, SDZ 208-912; behaviour, rats 263
tetanus toxin, botulinum-A toxin, cyclic nucleotides, exocytosis; chromaffine cells, bovine cell cultures 387
thimerosal, phosphodiesterase inhibitors, superoxide release; human polymorphonuclear leukocytes, 682
thiocyanate, neurotransmitter, lyotropic anions; vascular smooth muscle, rats 193
tianeptine, antidepressants, serotonin; medial septal neurons, rats 568
transmural stimulation, acetylcholine release, nerve stimulation; trachea, rats, guinea-pig 403
tropireton, cancer chemotherapy, vomiting, 5-HT; house musk shrew 564

U

U-86170f, dopamine autoreceptor agonist; rats 509
uptake 1, noradrenaline, stady-state concentration gradient; vas deferens, rats 41

V

vanilloid receptors, capsaicin analogs, resiniferatoxin; dorsal root ganglion, rats 551
vascular selectivity, inotropism, dihydronaphthyridines, dihydropyridines; porcine cardiac and vascular smooth muscle 337
vasoconstriction, cysteinyl-leukotrienes, platelet-activating factor; porcine pulmonary blood vessels 495
vasodilating action, 2-nicotinamidoethyl acetate, potassium channel opener, nicorandil; aorta, rabbit 235
vasodilator potencies, nicorandil; coronary arteries, dog 589
vasorelaxants, potassium channel openers; vascular muscle, rats, 706
vasorelaxation, cromakalim, minoxidil, K-channel openers; aorta, rats 351
venom phospholipase A2, Naja naja atra venom, mast cells, kinin; hind-paw, rats 377
verapamil derivatives, action potential, pacemaker current, potassium outward current, YS 035; cardiac Purkinje fibres, sheep, 653
veratridine, calcium uptake, sodium channel, anti-ischemic compounds; left atria, rats 101
vomiting, 5-HT, tropireton, cancer chemotherapy; house musk shrew 564

Y

yohimbine, serum drug concentrations, brain drug concentrations; injections, rats 308
YS 035, verapamil derivatives, action potential, pacemaker current, potassium outward current; cardiac Purkinje fibres, sheep, 653
